1 *CSI Media – Front End Technical Test*

Breakup as much of the design as you wish; until you feel you have demonstrated enough of your ability to follow a design, quality of your code & working process. Please let us know how long you spent on your submission.

Because we haven't supplied any design notes or PSD files we won't be overly critical when it comes to font weights & sizes etc. but we will be checking attention to detail & tools such as pixel perfect can be used to double check your implementation of the design.

HTML5 & CSS3 Standards.

Please use LESS (preferred) or SASS for pre-processing your CSS and please submit both your compiled CSS file and LESS/SASS file.

Grid System to be used is bootstrap and can be found here <http://getbootstrap.com/>

Designs can be found inside the /_test folder. There are designs for 0-768px (320.jpg), 768-992px (768.jpg), 992px-1200px (992.jpg), 1200px + (1200.jpg & 1920-fullwidth.jpg)

Assets such as imagery and branding can be found in the /assets folder

Font can be found here <https://www.google.com/fonts#UsePlace:use/Collection:Sniglet>

Icons such as search, menu and social media created using <http://fontawesome.github.io/Font-Awesome/>

Please feel free to add your own hover effects and interactions.
